# Celebrating MACC 10-Year Anniversary

5-7 June 2007

NAVPHIBASE Little Creek, Norfolk, VA  
<http://www.boats.dt.navy.mil/macc>

*A Decade of Fostering Open Communications & Partnership  
Between  
Government and the Maritime Industry*

## THE IMPORTANCE OF THE MACC CONFERENCE

Please mark your calendar for 5-7 June 2007 and join us as we celebrate the 10th Year Anniversary of the Multi-Agency Craft Conference (MACC). During the past ten years, MACC has established itself in the maritime arena world-wide as the only conference devoted to military boats and combatant craft.

Past, current, and future world environments have placed increased emphasis on the role of seagoing vessels to prosecute new challenges in Homeland Security, Force Protection, Littoral Warfare, and Special Warfare Operations missions. Operational demands of these missions require more advanced and stealthier craft, yet acquisition must find balance between meeting requirements and staying within budget. MACC's purpose is to provide a forum for open exchange and discussion about boats and craft between Government agencies and the maritime community in order to improve the support to our nation's warfighters across the spectrum of military operations. Over the years, MACC has provided its participants in the boats/craft community unique opportunities to:

- Capitalize on the joint nature of today's military environment from technical presentations and lessons learned
- Experience marine technical innovations via hands-on, in-water demonstrations
- Browse the exhibits and speak with vendors about their latest products
- Network with other maritime professionals in an informal social atmosphere

At MACC 2007, we will celebrate the present and future with key venues that attendees have come to expect and enjoy.

We look forward to another successful MACC and hope to see you there.

## MACC 2006 KEYNOTES

RDML R. C. Parker, USCG  
Director of  
Capabilities  
USCG

Mr. C. R. Reeves  
Director  
NAVSEA Ships & Ship  
Systems Product Area

RADM D. K. Bullard, USN  
Commander  
Navy Expeditionary Combat  
Command

## MACC 2007 FEATURES

- \* Keynote Speakers
- \* In-water demonstrations of new and advanced watercraft technology
- \* Concurrent presentations so participants can choose topics of interest by government and industry experts
- \* Static displays of craft and craft related equipment
- \* Over 100 exhibits of boat/craft related products
- \* Opportunity for networking and enhancing communication in an informal social setting
